

# Trionex<sup>TM</sup>

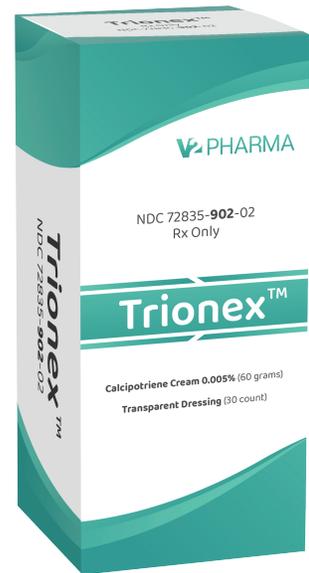

NDC 72835-902-02

**Contents:**  
Calcipotriene Cream 0.005% (60 grams)  
Hydrofilm Transparent Dressing (30 count)

**Typical Prescribing Directions:**

Apply a thin layer of calcipotriene cream to the affected skin 1-2 times daily and rub in gently and completely. The safety and efficacy of calcipotriene cream have been demonstrated in patients treated for eight weeks.

Once calcipotriene has been rubbed in completely, apply transparent dressing to the affected area as needed as a protectant.

**Indicated For:**

Calcipotriene is indicated for the treatment of plaque psoriasis. The dressing is used to protect against secondary infection and against mechanical irritation of wounds in later stages of healing.

**Contraindications:**

Do not use if known hypersensitivity to any of the listed ingredients of any of the components included in the Trionex kit. Calcipotriene cream is contraindicated in those patients with a history of hypersensitivity to any of the components of the preparation. It should not be used by patients with demonstrated hypercalcemia or evidence of vitamin D toxicity.

**Warnings and Precautions:**

Keep this and all other medications out of the reach of children. Please read all precautions and warnings of each component within this kit.

**PREGNANCY**

If pregnant or breast feeding, ask a health professional before use.
